

PERMASEAL 2000

TECHNICAL INFORMATION

Description:

Permaseal 2000 is a specially formulated solvent acrylic lacquer designed to meet the application demands of the decorative concrete finishing industry. Once cured the film forms a tough protective coating which both protects and highlights the colours in the finish.

Suitability:

Permaseal 2000 is recommended for use on Pattern Stamped concrete surfaces and resealing of old previously sealed concrete surfaces where a thinner lacquer is adequate.

Typical Properties:

Appearance	Thin clear solvent based liquid
Solids content	Approx 20 - 21 %

Method of application:

Permaseal 2000 is designed to be spray applied but can also be applied by broom. Best results are obtained by putting down two coats with adequate drying time between.

Improved penetration of the first coat can be obtained by the addition of approx 15 % Solvent (SL05 - SL200).

Rotate stock and protect from freezing.
